ABOUT ME

a web developer, SEO executive, graphic designer, and content creator based in Vadodara, Gujarat. I'm currently studying for a B.Voc in Information Technology at Sigma University, and alongside that, I work as an SEO Executive Intern, which has taught me a lot that classroom work alone wouldn't. Between the two, I spend my time building responsive websites, designing graphics, and figuring out how to get sites ranking better on search engines.

WORK EXPERIENCE

WEB DEVELOPER

CareerNaksha | Vadodara

- Building sites that actually work well on desktop, tablet, and mobile — not just "technically responsive"
- Putting together modern UI layouts with HTML5, CSS3, and JavaScript
- Building out dynamic features on the backend with PHP and MySQL
- Digging into performance issues and cutting down load times
- Applying SEO fundamentals so the sites are easier to find, not just easier to look at
- Adding animations and small interactive touches that make the interface feel less static
- Using Git and GitHub to keep track of changes and avoid the usual version-control headaches

PROJECTS

Personal Portfolio Website

Designed and developed a fully responsive personal portfolio website to showcase my web development projects, technical skills, internship experience, graphic design work, SEO case studies, certifications, and resume. Focused on creating a modern UI/UX with smooth animations, responsive layouts, accessibility, and performance optimization.

Tech Stack: HTML5, CSS3, JavaScript, Git, GitHub Pages

Key Features:

- Responsive design for desktop, tablet, and mobile
- Interactive project showcase with filtering
- Smooth animations and modern UI
- Contact form integration
- SEO-friendly structure and optimized performance
- Resume download and social media integration

SKILLS
